

RESOLUTION

No. 1(1) IX 2022 The Central Revolutionary Committee of Internationalist Revolutionary Communist Party

Regarding the death of Queen Elizabeth II, the Internationalist Revolutionary Communist Party, in the process of being formed, expresses its position.

The IRCP expresses its views and claims that both the death of Queen Elizabeth II, and the election of the new UK Prime Minister, Liz Truss, will not change anything and will even worsen the situation of British society, the British popular masses.

As in the past under Queen Elizabeth II and former prime ministers of government, British domestic and foreign politics safeguards the security of great financial capital and landlords, especially the royal family, considered by their old - fashioned and rotten feudal thinking as a social class that believes it is better than other people. This policy, was and is currently aimed at maintaining support for the imperialist interests of the bourgeois class to maintain power and secure the interests of the British oligarchy, and thus to maintain British capitalism with exploitation and inhuman oppressions of the working masses to pursue the full idleness and laziness of the rich life of the political elite with the family royal at the helm. The current situation with the growing economic crisis and the deepening decline in the standard of living of British society is the result of the stormy liberal policies of both Queen Elizabeth II, who ruled for the last 70 years and her predecessors.

The IRCP expressly opposes the continued maintenance and payment of the working masses of its own labor for a group of social parasites of German roots with collaboration with Nazism. This social group called the '*royal family*' headed by Queen Elizabeth II, and now the new oppressor of the working class - King Charles III - did, and will do everything to keep the feudal institution of the monarchy in Great Britain at all costs. The IRCP condemns and does not recognize the coercive state power of a monarchist ruling class that has been tainted with racism, the recognition and formal legalization of slavery, and the crimes of the British Empire around the world.

The IRCP observes with contempt and amusement the media show hosted by the British bourgeois mass media, that Queen Elizabeth II, '*... has led a wonderful and decent loving life for her subjects ...*'. This falsehood and fiction is a deliberate socio - technical maneuver by the bourgeois ruling classes to fool and keep in the atmosphere of the legend of the so - called: '*great Queen*' - the British popular masses. Only in what the person hailed by the crowd of bully lazy people - the Queen II - was great, she was great in the exploitation and oppression of the peoples and nations of other countries of the world under the yoke of British colonial imperialism.

Moreover, the new British prime minister's first activities shows a complete lack of political responsibility and meaning to act for the good of British society. The so - called '*Truss energy plan*' it is illogical and pointless and will only bring improvement for energy companies by transferring gigantic public money to this economic sector, which has already brought private owners huge profits from increases in energy and gas prices. Funding capitalist companies with public money, which has been taxed from the working class (and is in fact their property), is an act of economic murder for ordinary people who will gain nothing and help at all, and it is only an activity supporting the British capitalism. The so - called '*Truss energy plan*' will bring nothing new and better in improving the standard of living of the British working class. This is absurd and deeply irresponsible actions as well as her irresponsible talks and persuasions in conferences with India state about support to the Ukrainian war. Urging the Indian Minister of Foreign Affairs to cooperate for military support for Ukraine is an action that threatens world peace and that is dangerous for international peace relations.

The International Revolutionary Communist Party, will actively fight by legal and illegal means to overthrow the bourgeois monarchist government and establish a British Socialist Soviet Republic.

The International Revolutionary Communist Party, will conduct intense ideological and propaganda work, among the British popular masses, all working classes, to raise class consciousness and organize for the struggle for socialism, for socialist revolution.

INTERNATIONALIST REVOLUTIONARY COMMUNIST PARTY
CONDEMNS BRITISH IMPERIALISM
AND IS AGAINST THE BRITISH MONARCHY!

DOWN WITH BRITISH IMPERIALISM!
LONG LIVE SOCIALIST REVOLUTION!

Comrade 'Kim'
Temporary General Secretary
Central Revolutionary Committee
of Internationalist Revolutionary Communist Party
